WUEST

WUEST is a team of six individuals with diverse backgrounds in music and club culture formed in early 2019. Apart from their individual projects, they teamed up to pursue events which are in between music, performance, and technology. In the process, they fill unusual spaces with happenings that bring new perspectives to known places. This also involves pushing the boundaries of well-known event formats.

Up until now, the young project cooperated with the independent WUK Theater space in Halle, Germany. Examples of this cooperation were the interpretation of the question for a Better Life as a concert and how society changes through technology during the Futur event series.

WUEST is responsible for the conceptualization and planning of events together with its partners. As a whole, this includes conception, curation, technical realisation and artist relations.
